

STAKWEL AND SCAPEWEL

The **STAKWEL** modular window well system features high-density polyethylene molded inserts that add strength and rigidity to withstand adverse freeze/thaw and settling conditions while backfilling.

- Satisfies Section 310.4 of UBC and IRC 2009 Building Code for basement egress
- Maintenance Free
- Standard 5 year warranty
- One Module does it all! STAKWEL can be used on foundations of up to ten foot and greater in depth.
- Dome cover available

The **SCAPEWEL** window well system consists of side and step panels that simply snap together onsite to create a safe escape staircase in case of emergency egress.

- Step design can be landscaped with plants or flowers for added visual enhancement
- High density polyethylene molded construction will never rust, rot, or change color.
- Attractive driftwood color complements basement interior
- Easily cleaned with standard household products
- Available in a number of sizes to accommodate virtually any foundation height.
- Grate and dome covers available
